APPOINTMENTS

- Graduate Assistant, New Mexico State University** May 2024 - Present
Department of Computer Science, Las Cruces, New Mexico, USA
- Mentoring undergraduate students in courses.
- Teaching Assistant, New Mexico State University** May 2024 - Present
Department of Computer Science, Las Cruces, New Mexico, USA
- Mentored students in courses like Senior Project, Software Development, Modern Web Technologies.
- Graduate Assistant, New Mexico State University** Aug 2022 - May 2024
College of Engineering, Las Cruces, New Mexico, USA
- Supported faculty undergraduate students with coursework related to Programming and Embedded Systems.
- Software Engineer, Monico Technologies LTD** Jul 2018 - Jul 2022
Dhaka, Bangladesh
- Developed software applications including vehicle tracking, ride-sharing, and online grocery platforms.
 - Improved web-server performance by approximately 25% using Python asyncio, uvloop, and Redis; refactored code to improve maintainability and scalability by approximately 15%.
 - Resolved system bugs and reliability issues while collaborating with UI/UX, project management, and quality assurance teams.

EDUCATION

- Ph.D. in Computer Science, New Mexico State University** Aug 2024 - Present
Las Cruces, New Mexico, USA
- Master of Computer Science, New Mexico State University** Aug 2022 - May 2024
Las Cruces, New Mexico, USA
- BS in Computer Science and Engineering, North South University** Sep 2012 - Dec 2017
Bangladesh

SCHOLARSHIP

Peer-Reviewed, Archival Publications

1. S. B. AHMED BONY, AND HAMILTON B. Electrify My Ride: How Online DIY EV Community Practices and Spaces Support Collaborative Knowledge Creation and Sharing. Accepted to the ACM International Conference on Supporting Group Work (GROUP 2027).

Manuscripts in Preparation

2. S. B. AHMED BONY. Investigating Self-Hosting Communities. Manuscript in preparation; planned for submission to the ACM CHI Conference on Human Factors in Computing Systems (CHI 2028), September 10, 2027.

RESEARCH

DIY Electric Vehicle Communities

- Investigated DIY electric vehicle communities as collaborative ecosystems for technical problem-solving using forum analysis and semi-structured interviews.
- Examined build documentation, troubleshooting, iterative knowledge creation, archiving, and design opportunities for future community platforms.

Self-Hosting Communities

- Investigating motivations, challenges, community interaction, technical dependencies, knowledge sharing, autonomy, privacy, and control in self-hosting ecosystems.

Enshittification of the Internet and Online Communities

- Planned research on how commercialization and increasing platform control affect online communities and motivate interest in independent or community-oriented alternatives.

TEACHING

Software Technology II (ET 362)

As Teacher, College of Engineering, New Mexico State University

Spring 2024

- Instructed students in the use of Software technologies including Object oriented programming in Python.
- Mentored student teams to ensure successful code software projects

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, C/C++, Java

Frameworks / Platforms: Node.js, Tornado, Sanic, Flask, Django, Django REST Framework, Android

Databases: MongoDB, Redis, PSQl, MySQL

SERVICE AND INVOLVEMENT

Secretary, Bangladesh Student Association, NMSU

Sep 2022 - Sep 2023

Member, Mini Baja Club, NMSU

Member, Atomic Aggies, NMSU

INTERESTS

Playing drums, mountain biking, traveling, and DIY car builds.
